

EH Sync broker portal launch: Euler Hermes supports key business partners

PARIS – 7 JUNE 2017 – Euler Hermes, the world’s leading trade credit insurer, today announced the rollout of its innovative new “EH Sync” portal. Developed in close collaboration with brokers, its features include an advanced mobile-ready, digital interface with 360° policy data views and real-time customized alerts.

Reflecting Euler Hermes’ digital focus and broker collaboration strategy, EH Sync involved extensive international research and testing throughout the portal’s development with more than 200 managers from 25 broker firms.

“EH Sync is a key initiative to strengthen our engagement and transparency with our broker business partners, helping them develop their businesses and making access to data and process flows easier,” said Paul Overeem, Euler Hermes Board member responsible for commercial and distribution activities. “By listening to and working directly with our partners, we continue to improve our understanding of their business needs and priorities. EH Sync is testimony to our continued commitment to these important relationships, by empowering their future business success.

“As its name confirms, EH Sync is a synchronization of Euler Hermes’ credit risk and analysis expertise and the personal engagement of brokers who directly helped drive the portal’s design and features from inception to delivery. Brokers told us they want easy access to accurate and globally consistent information -- all in one place -- that saves them time and provides enhanced portfolio monitoring. Initial broker feedback has been very positive – in particular, how easy it is to use on the move, the real-time 360° policy data views and personalized alerts.”

“EH Sync is at the heart of our strategy of customer collaboration and investment in digitalization to increase operational and service excellence,” said Ludovic Sénécaut, Euler Hermes board member responsible for operations and IT services. “This strategic investment has been wide-ranging. While an “agile IT” approach facilitated real-time user testing and continuous improvement, the portal’s development paralleled and was supported by our major Master Data Management upgrade program. We will continue to refine EH Sync, adding new features and services that provide real value for our business partners.”

EH Sync is being launched following a successful Netherlands pilot program earlier this year. The first wave of the EH Sync broker portal launch will include the UK, Italy and Belgium with a further rollout in other countries in the coming months.
